

ECOFIN GLOBAL RENEWABLES INFRASTRUCTURE UCITS FUND

Dated 1 December 2022

ANNEX II

Template pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Ecofin Global Renewables Infrastructure UCITS Fund

Legal entity identifier: 6354001IUQGYUMLI3M79

Sustainable investment objective

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective:** 90%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective:** %

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

What is the sustainable investment objective of this financial product?

The Fund has sustainable investment as its objective.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

The Sub-Investment Manager believes that decarbonizing electric generation has the potential to decarbonize significant portions of our economy and contributes substantially to climate change mitigation.

The Fund aims to create positive environmental impact by investing in companies that are materially involved in economic activities that are considered climate change mitigation by virtue of their contribution to one or more of the UN SDGs.

The portfolio construction process restricts investments to companies that align with certain of the Sub-Investment Manager's Sustainable Investment Themes. Specifically this Fund invests in one Sustainable Investment Theme, "**Electrification**".

Electrification: The power sector is undergoing a profound transformation driven by the decarbonisation and electrification of energy demand. Utilities are at the forefront of this multidecade transition. By adapting and, in many cases, substantially overhauling their business models to accommodate new greener technologies and decentralised power sources, utilities are bound to be major beneficiaries of secular growth and attractive returns on significant capital investments.

The Fund has not designed a reference benchmark for the purpose of attaining its sustainable investment objective.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

Greenhouse Gas Emissions: Consistent with the ESG focus of the fund, the Sub-Investment Manager is particularly interested in Greenhouse Gas Emissions (GHG) of portfolio investments. The investment due diligence process considers GHG emissions, Carbon footprint, GHG intensity, Exposure to fossil fuels, Share of non-renewable energy, Emissions of inorganic & air pollutants, and investments in companies without carbon emission reduction initiatives.

● ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

All sustainable investments need to meet minimum sustainability criteria, as determined by the investment due diligence process, completed during the investment process and reviewed on an ongoing basis. This review includes:

Principal Adverse Impact (“PAI”): The negative impact of investments on sustainability factors is taken into consideration as an integrated part of the Sub-Investment Manager’s investment process.

Norms-based Screening: Exclusion filters are applied to the portfolio construction process to restrict investments in companies that are allegedly involved in breaches of international law and norms on environmental protection, human rights, labour standards and anti-corruption.

Firm-level Exclusions (including the Sub-Investment Manager’s Fossil Fuel Policy): Exclusion filters are applied in the construction process to restrict investments in companies that may be involved in the production of fossil fuels and controversial weapons.

— — *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The Sub-Investment Manager uses a variety of financial and non-financial factors during the initial investment process and on-going diligence of its investments.

Where reliable data is available, the process seeks to incorporate mandatory indicators for adverse impacts on sustainability factors as described in the Joint Committee draft Regulatory Technical Standards (RTS) on ESG disclosures as part of the ESG dataset reviewed for each investment. Depending on determinations of materiality to the individual investments and availability of reliable data, the Sub-Investment Manager may also seek to incorporate one or more additional indicators as described in the RTS into the ESG data evaluated.

Greenhouse Gas Emissions: Consistent with the stated ESG focus of the fund, the Sub-Investment Manager is particularly interested in GHG of portfolio investments. The investment due diligence process considers GHG emissions, Carbon footprint, GHG intensity, Exposure to fossil fuels, Share of non-renewable energy, Emissions of inorganic & air pollutants, and investments in companies without carbon emission reduction initiatives.

Biodiversity: The investment due diligence process considers potential impacts on biodiversity-sensitive areas and where appropriate engages with investments and potential investments to understand policies related to protecting biodiversity.

Water: The investment due diligence process considers water usage and recycling and emissions to water.

Waste: The investment due diligence process considers hazardous and radioactive waste production.

Social and employee matters: The investment due diligence process reviews investments for violations of UN Global Compact and OECD Guidelines, policies

related to monitoring compliance with UN Global Compact and OECD Guidelines, and exposure to controversial weapons.

Human Rights: The Sub-Investment Manager cares deeply about human rights and reviews policies and procedures around human rights, human, trafficking, child labour, and forced or compulsory labour.

Anti-corruption and anti-bribery: The investment due diligence process considers anti-corruption and anti-bribery policies.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Included in the Sub-Investment Manager’s due diligence process for the Fund are the social considerations of people, communities, and relationships, as well as standards for operating, managing, and sustaining a company.

The Sub-Investment Manager strives to ensure that the portfolio companies are against any form of slavery and forced labour and are committed to ethical business practices. The Sub-Investment Manager seeks to mitigate the Fund’s exposure to corruption and modern slavery through due diligence on all portfolio companies.

As part of the Sub-Investment Manager’s internal due diligence process, all existing and potential investments are routinely screened through one or more specialized ESG research providers to assess any violations of acceptable business practices including alignment with OECD Guidelines and UN Guiding Principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

- Yes
- No

The Sub-Investment Manager considers principal adverse impacts on sustainability factors when determining whether an investment does significant harm to any environmental or social objectives, as further described above.

Information on PAI on sustainability factors will be made available in the annual report to be disclosed pursuant to SFDR Article 11(2).

What investment strategy does this financial product follow?

The Sub-Investment Manager of the Fund believes that societies need to accelerate the transformation to a greener, decarbonized and more sustainable economy. Due to this belief, the fund is primarily focused on investing in companies that are positioned to benefit from the pursuit of mitigating climate change.

As a result of the objective of Climate Change Mitigation, the Sub-Investment Manager believes the investments in the Fund generate a more sustainable future as described by the United Nations Sustainable Development Goals 7, 9, 11, 12, & 13, which, among other things, call for climate action, responsible consumption and production, sustainable communities, and affordable and clean energy for all. According to the UN, a sustainable future is defined as development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

ESG research is thoroughly incorporated into the investment process for the Fund. Each company has an assigned analyst who is responsible for all aspects of the research process and for engaging with company management. The Sub-Investment Manager primarily utilizes company filings and engagement with management teams in its ESG assessment for qualitative analysis. The Sub-Investment Manager has access to specialist research from third-party providers which can serve to augment and support its in-house research.

The Sub-Investment Manager believes that well-managed companies actively managing their ESG risks are more capable of generating superior long-term performance. A thorough understanding of ESG issues empowers companies to potentially mitigate risks and take advantage of the opportunities resulting from these issues.

As discussed in the “Investment Strategy”, “Sustainability Risks” and “Annex I” sections of this Supplement, the Sub-Investment Manager’s research process integrates both traditional fundamental analysis with ESG factors. The Sub-Investment Manager believes these analyses may impact and reflect into a company’s overall shareholder returns. Each company has an assigned analyst who is responsible for all aspects of the research process and for engaging with company management, including ESG-related issues, in populating the risk-based model to seek to provide better risk-adjusted returns. The Sub-Investment Manager’s perspective or edge in addressing renewable infrastructure is derived from its significant expertise in dealing with and evaluating policy frameworks within some of the major GHG emitting industries, in particular utilities and sustainable infrastructure.

The principal area of market inefficiency the Sub-Investment Manager is looking to exploit relates to its proprietary views on how policy frameworks (and laws) around ESG matters, such as climate change and emission efficiency, together with technology

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

innovations, can conspire to create substantial deviations in market expectations.

- ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

ESG research is thoroughly incorporated into the investment process for the Fund. Each company that the Sub-Investment Manager follows in the Fund's investment universe has an assigned analyst who is responsible for all aspects of the research process and for engaging with company management.

Sustainability risk analysis is also a part of the Sub-Investment Manager's stock assessment process. The Sub-Investment Manager seeks to identify actual or potential ESG risks to a company or its business model and to ascertain the materiality of such sustainability risks. The primary goal is to understand the nature of potential risks and whether they could derail or materially impact the underlying investment case for a company's shares.

Investments in the Fund align with the Sub-Investment Manager's Sustainable Investment Theme of "Electrification".

The Fund is committed to a minimum portion of investments to be sustainable investments as defined by the Sub-Investment Manager's proprietary methodology that identifies sustainable investments based on contribution to UN SDGs and/or Taxonomy-aligned activities.

- ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices of investee companies is addressed in various layers of the security selection process. Governance safeguards exist at both the Norms-based screening as well as the PAI process. Among other items, these processes consider sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation
describes the share of investments in specific assets.

Good governance
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation and the minimum share of sustainable investments?

A

minimum of 90% of the investments of the product are used to meet the environmental objectives of the product in accordance with the binding elements of the investment strategy.

The purpose of the remaining 10% proportion of the investments, if any, that are not used to meet the environmental and social characteristics promoted by the product is cash held as ancillary liquidity or for risk balancing purposes.

How does the use of derivatives attain the sustainable investment objective?

The fund does not intend to use financial derivative instruments for attainment of the sustainable investment objective.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the Fund's net asset

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

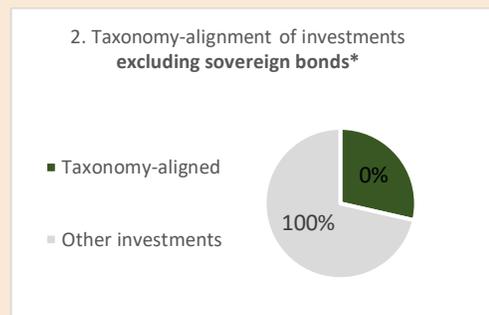

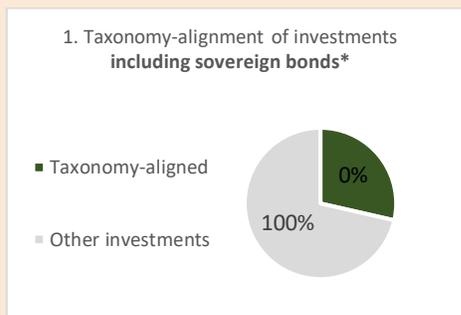

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

minimum share of investments in transitional and enabling activities?

0% of the Fund's net assets

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

90% of the Fund's net assets

In assessing whether an investment is considered to be in environmentally sustainable economic activities (i.e. taxonomy aligned), the Sub-Investment Manager must be satisfied that the relevant economic activity (i) contributes substantially to the environmental objective of climate change mitigation or climate change adaptation, (ii) does not significantly harm any of the environmental objectives outlined in Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation"); (iii) is carried out in compliance with the minimum safeguards laid down in the Taxonomy Regulation and (iv) complies, as of the date of this Supplement, with the technical screening criteria relating to climate change mitigation and climate change adaptation (as applicable) set down in Commission Delegated Regulation 2021/2139 (EU).

The Sub-Investment Manager cannot currently satisfy itself that the investments within the portfolio meet the aforementioned criteria.

The Fund may invest in economic activities that are not yet eligible to be environmentally sustainable economic activities or for which the technical standards are not yet finalised (i.e. the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control and the protection and restoration of

biodiversity and ecosystems)

What is the minimum share of sustainable investments with a social objective?

0% of the Fund's net assets

What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

Cash may be held as ancillary liquidity or for risk balancing purposes.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

No

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

N/A

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

N/A

- ***How does the designated index differ from a relevant broad market index?***

N/A

- ***Where can the methodology used for the calculation of the designated index be found?***

N/A

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.
